

MEMPROTEC

MEMPROTEC Inc was founded in 2005, the owner M. Denis Côté and key personnel cumulate more than 50 years of experience in membrane filtration technologies.

MEMPROTEC manufactures concentration and filtration equipments using microfiltration, ultra filtration, nano filtration and reverse osmosis membrane elements of various configurations.

MEMPROTEC systems are used for water desalination, brackish water filtration and water recuperation and reuse in municipal, industrial and agricultural markets. Our enterprise also designs equipments for filtration and concentration of fruit juices, vegetable extracts, maple sap and other non conventional filtration or concentration processes.

MEMPROTEC SUPPORTS ITS CLIENT'S NEEDS BY DRAWING UPON ITS EXTENSIVE KNOWLEDGE AND EXPERIENCE:

A well-known innovative capability:

The research and development effort of MEMPROTEC has lead to design new pumps and implement new recirculation techniques.

An unequalled know-how:

MEMPROTEC has a wealth of knowledge to offer clients, whatever the needs – hydraulic or mechanical, chemical or biological, membrane or other technologies

Experienced technical support:

MEMPROTEC's commitment to its clients is continuous: from design to fabrication, from installation to start-up. Memprotec's technical teams support the client with "hands on"operational assistance, technical information and thorough operator training sessions

Modern project management working methods :

Faced with more stringent and demanding regulations, equipment performance and reliability are the main concerns of municipalities and companies; MEMPROTEC products exceed industry standards in performance and reliability since they are designed and fabricated to respect the most stringent market requirements. Beyond functional requirements, MEMPROTEC is fully-dedicated to environmental protection. We take great pride in designing and manufacturing quality products of unmatched durability and simplicity.
