

Releasers and humidity trap

ÉrabliTEK releaser

Four models available depending on the number of taps and each of them is available either much mechanical or electrical.

- Releaser 12" +/- **2 500 taps**
- Releaser 24" +/- **5 000 taps**
- Release 36" +/- **10 000 taps**
- Release 48" +/- **15 000 taps**

No sap kick-back

The ÉrabliTEK No sap kick-back is designed to physically prevent water from backing up to your vacuum pump and protect it from damage. In the event that nothing is able to stop the flow of water that goes back to your vacuum pump, the No sap kick-back will be the ultimate protection.

It is available for air line 2" and 3".

Humidity trap

The ÉrabliTEK moisture trap is designed to operate in absolute vacuum. It removes as much as possible the fine water droplets that can reach the vacuum pump with its centrifugal force and coalescing filters.

- **1 filter** : Maximum **3 000 taps**
- **2 filters** : Maximum **6 000 taps**
- **3 filters** : Maximum **9 000 taps**
- **4 filters** : Maximum **12 000 taps**
- **5 filters** : **12 000 taps +**
